

Communicative damper actuator for adjusting dampers in technical building installations

- Air damper size up to approx. 1 m<sup>2</sup>
- Torque motor 5 Nm

**Technical data** 

- Nominal voltage AC/DC 24 V
- Control modulating, communicative, hybrid
- Communication via BACnet MS/TP, Modbus RTU, Belimo-MP-Bus or conventional control
- Conversion of sensor signals

Electrical data	Nominal voltage	AC/DC 24 V
	Nominal voltage frequency	50/60 Hz
	Nominal voltage range	AC 19.228.8 V / DC 21.628.8 V
	Power consumption in operation	2.5 W
	Power consumption in rest position	1.3 W
	Power consumption for wire sizing	5 VA
	Connection supply / control	Cable 1 m, 6x 0.75 mm²
Data bus communication	Communicative control	BACnet MS/TP Modbus RTU (factory setting) MP-Bus
	Number of nodes	BACnet / Modbus see interface description MP-Bus max. 8
Functional data	Torque motor	5 Nm
	Torque variable	25%, 50%, 75% reduced
	Operating range Y	210 V
	Operating range Y variable	0.510 V
	Position feedback U	210 V
	Position feedback U note	Max. 1 mA
	Position feedback U variable	Start point 0.58 V End point 210 V
	Position accuracy	±5%
	Direction of motion motor	selectable with switch 0/1
	Direction of motion variable	electronically reversible
	Direction of motion note	Y = 0%: At switch position 0 (ccw rotation) / 1 (cw rotation)
	Manual override	with push-button, can be locked
	Angle of rotation	Max. 95°
	Angle of rotation note	can be limited on both sides with adjustable

Rated impulse voltage supply / control  O.8 kV  Pollution degree  3  Ambient humidity  Max. 95% RH, non-condensing  Ambient temperature  -3050°C [-22122°F]  Storage temperature  -4080°C [-40176°F]  Servicing  maintenance-free		Hygiene test	104-01, cleanable and disinfectable, low
Pollution degree 3  Ambient humidity Max. 95% RH, non-condensing  Ambient temperature -3050°C [-22122°F]  Storage temperature -4080°C [-40176°F]  Servicing maintenance-free		Type of action	Type 1
Ambient humidity  Ambient temperature  Ambient temperature  Storage temperature  Servicing  Max. 95% RH, non-condensing  -3050°C [-22122°F]  -4080°C [-40176°F]  maintenance-free		Rated impulse voltage supply / control	0.8 kV
Ambient temperature -3050°C [-22122°F]  Storage temperature -4080°C [-40176°F]  Servicing maintenance-free		Pollution degree	3
Storage temperature -4080°C [-40176°F]  Servicing maintenance-free		Ambient humidity	Max. 95% RH, non-condensing
Servicing maintenance-free		Ambient temperature	-3050°C [-22122°F]
		Storage temperature	-4080°C [-40176°F]
Weight Weight 0.55 kg		Servicing	maintenance-free
	Weight	Weight	0.55 kg

# Safety notes

- This device has been designed for use in stationary heating, ventilation and air-conditioning systems and must not be used outside the specified field of application, especially in aircraft or in any other airborne means of transport.
- Outdoor application: only possible in case that no (sea) water, snow, ice, insolation or aggressive gases interfere directly with the device and that it is ensured that the ambient conditions remain within the thresholds according to the data sheet at any time.
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied with during installation.
- The device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user.
- Cables must not be removed from the device.
- To calculate the torque required, the specifications supplied by the damper manufacturers concerning the cross-section and the design, as well as the installation situation and the ventilation conditions must be observed.
- The device contains electrical and electronic components and must not be disposed of as household refuse. All locally valid regulations and requirements must be observed.

#### **Product features**

Operating mode

The actuator is fitted with an integrated interface for BACnet MS/TP, Modbus RTU and MP-Bus. It receives the digital control signal from the control system and returns the current status

**Converter for sensors** 

Connection option for a sensor (passive, active or with switching contact). In this way, the analogue sensor signal can be easily digitised and transferred to the bus systems: BACnet, Modbus or MP-Bus.

Parametrisable actuators

The factory settings cover the most common applications. Single parameters can be modified with the Belimo service tools MFT-P or ZTH EU.

The communication parameters of the bus systems (address, baud rate etc.) are set with the ZTH EU. Pressing the "Address" button on the actuator while connecting the supply voltage resets the communication parameters to the factory setting.

Quick addressing: The BACnet and Modbus address can alternatively be set using the buttons on the actuator and selecting 1...16. The selected value is added to the "basic address" parameter and results in the absolute BACnet and Modbus address.

Combination analogue - communicative (hybrid mode)

With conventional control by means of an analogue control signal, BACnet or Modbus can be used for the communicative position feedback

Simple direct mounting

Simple direct mounting on the damper shaft with a universal shaft clamp, supplied with an anti-rotation device to prevent the actuator from rotating.

Manual override

Manual override with push-button possible (the gear train is disengaged for as long as the button is pressed or remains locked).

Adjustable angle of rotation

Adjustable angle of rotation with mechanical end stops.

High functional reliability

The actuator is overload protected, requires no limit switches and automatically stops when the end stop is reached.

Home position

The first time the supply voltage is switched on, i.e. at the time of commissioning, the actuator carries out a synchronisation. The synchronisation is in the home position (0%).

The actuator then moves into the position defined by the control signal.

#### Adaptation and synchronisation

An adaptation can be triggered manually by pressing the "Adaptation" button or with the PCTool. Both mechanical end stops are detected during the adaptation (entire setting range).

Automatic synchronisation after pressing the manual override button is configured. The synchronisation is in the home position (0%).

The actuator then moves into the position defined by the control signal.

A range of settings can be adapted using the PC-Tool (see MFT-P documentation)

## Accessories

Tools	Description	Туре
	Service tool, with ZIP-USB function, for parametrisable and communicative Belimo actuators, VAV controller and HVAC performance	ZTH EU
	devices Belimo PC-Tool, Software for adjustments and diagnostics	MFT-P
	Adapter for Service-Tool ZTH	MFT-C
	Connecting cable 5 m, A: RJ11 6/4 ZTH EU, B: 6-pin for connection to service socket	ZK1-GEN
	Connecting cable 5 m, A: RJ11 6/4 ZTH EU, B: free wire end for connection to MP/PP terminal	ZK2-GEN

	Position indicator, Multipack 20 pcs.	Z-PI

## **Electrical installation**

Supply from isolating transformer.

The wiring of the line for BACnet MS/TP / Modbus RTU is to be carried out in accordance with applicable RS-485 regulations.

Modbus / BACnet: Supply and communication are not galvanically isolated. Connect earth signal of the devices with one another.

#### Wire colours:

1 = black

2 = red

3 = white

5 = orange

6 = pink

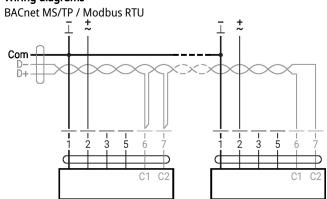

7 = grey

**Functions:** 

C1 = D - = A (wire 6)

C2 = D + = B (wire 7)

# Wiring diagrams

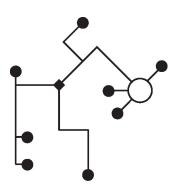

#### **Further electrical installations**

## Functions with specific parameters (Parametrisation necessary)

MP-Bus Network topology

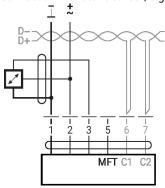

There are no restrictions for the network topology (star, ring, tree or mixed forms are permitted).

Supply and communication in one and the same 3-wire cable

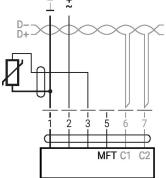

- no shielding or twisting necessary
- no terminating resistors required

Connection with active sensor, e.g. 0...10 V @ 0...50°C

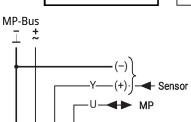

Possible input voltage range: 0...10 V Resolution 30 mV

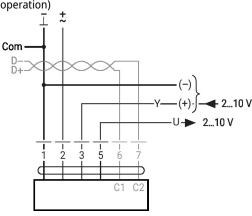

Connection with passive sensor, e.g. Pt1000, Ni1000, NTC

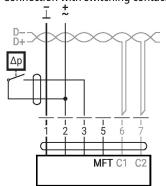

Ni1000	−28+98°C	$8501600 \Omega^{^{2)}}$
PT1000	−35+155°C	8501600 Ω <sup>2)</sup>
NTC	-10+160°C 1)	200 Ω60 kΩ <sup>2)</sup>

Modbus RTU / BACnet MS/TP with analogue setpoint (hybrid operation)

Connection with switching contact, e.g. Δp monitor

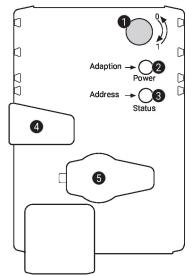

Switching contact requirements: The switching contact must be able to switch a current of 16 mA at 24 V accurately.

Start point of the operating range must be parametrised on the MOD actuator as ≥0.5 V.

- 1) depending on type
- 2) Resolution 1 Ohm Compensation of the measured value is recommended

## Operating controls and indicators

Direction of rotation switch

Switch over: Direction of rotation changes

2 Push-button and LED display green

Off: No power supply or malfunction

On: In operation

Flashing: In address mode: Pulses according to set address (1...16)

When starting: Reset to factory setting (Communication)

Press button: In standard mode: Triggers angle of rotation adaptation

In address mode: Confirmation of set address (1...16)

Push-button and LED display yellow

Off: Standard mode

On: Adaptation or synchronisation process active

or actuator in address mode (LED display green flashing)

Flickering: BACnet / Modbus communication active

Press button: In operation (>3 s): Switch address mode on and off

In address mode: Address setting by pressing several times When starting (>5 s): Reset to factory setting (Communication)

4 Manual override button

Press button: Gear train disengages, motor stops, manual override possible
Release Gear train engages, synchronisation starts, followed by standard

button: mode

Service plug

For connecting parametrisation and service tools

Check power supply connection

2 Off and 3 On Possible wiring error in power supply

#### Service

#### Quick addressing

- 1. Press the "Address" button until the green "Power" LED is no longer illuminated. The green "Power" LED flashes in accordance with the previously set address.
- 2. Set the address by pressing the "Address" button the corresponding number of times (1...16).
- 3. The green LED flashes in accordance with the address that has been entered (1...16). If the address is not correct, it can be reset in accordance with step 2.
- 4. Confirm the address setting by pressing the green "Adaptation" button.

If the address is not confirmed within 60 seconds, the address procedure will be ended. Any address change that has already been started will be discarded.

The resulting BACnet MS/TP and Modbus RTU address is made up of the set basic address plus the short address (e.g. 100+7=107).

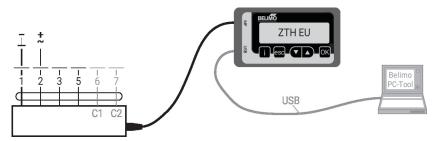

## Service

#### Tool connection

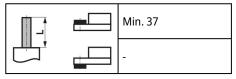

The actuator can be parametrised by ZTH EU via the service socket.

For an extended parametrisation the PC tool can be connected.
